Generated by the Travel Archaeology pipeline (scripts/travel-archaeology/). CONFIRMED = a booking email or Triplt notification with dates. CORROBORATED = CONFIRMED plus photo or Facebook presence that overlaps it. INFERRED = presence only, no booking found; never treat as a fact. RECURRING = a place visited 4+ times or 30+ days in one year (second home, family visits, or repeat trips — unanswered, so every visit still shows). Day trips (under one night) are listed separately below, not mixed into the year-by-year timeline above. NEVER TRAVELED = a booking that was made and then called off, where nothing in any source says a journey happened in that window; shown last, on its own, never inside the chronology.
